Hydrobiologia

The International Journal on Limnology and Marine Sciences

Volume 494, 1 March 2003

Theme

The Interactions between Sediments and Water

Guest Editor

Brian Kronvang

Interactions between sediments and water
Ellen L. Petticrew, Ian G. Droppo, Brian Kronvang 1–4

PART A: ASSESSING AND/OR RESTORING DISTURBED WATERSHEDS

Urbanization, sedimentation, and the homogenization of fish assemblages in the Etowah River Basin, USA
D. M. Walters, D. S. Leigh, A. B. Bearden 5–10

Using deterministic models to assess risk in sediment-impacted estuaries
A. Senior, M. Green, J. Oldman 11–16

Organic matter composition of gravel-stored sediments from salmon-bearing streams
E. L. Petticrew, J. M. Arocena 17–24

A scaling approach to spatial variability in early diagenetic processes
John W. Morse, Steven F. DiMarco, Andrew B. Hebert, Karen S. Sell 25–29

Relationship between Pb/Cd adsorption and metal oxides on surface coatings at different depths in Lake Jingyuetan
Y. Li, B. Y. Zhang, G. H. Huang, D. Dong, X. Hua 31–35

Scavenging of dissolved organic matter (DOM) by amorphous iron hydroxide particles $Fe(OH)_{3(s)}$
C. Luider, E. Petticrew, P. J. Curtis 37–41

Contemporary transport of suspended material and its deposition in the Vistula River, Poland
A. Lajczak 43–49

Seston sedimentation in a lowland river (River Spree, Germany): their spatial and temporal variations and controlling factors
H.-P. Kozerski 51–55

Variations in the water quality of a small urban tropical catchment: implications for load estimation and water quality monitoring
H. S. Lim 57–63

Measurement of the size and structure of natural aquatic colloids in an urbanised watershed by atomic force microscopy
D. Muirhead, J. R. Lead 65–69

PART B: SEDIMENT–WATER LINKAGES IN TERRESTRIAL AND AQUATIC ENVIRONMENTS

The sediment budget as conceptual framework and management tool
Olav Slaymaker 71–82

The role of overbank floodplain sedimentation in catchment contaminant budgets
D. E. Walling, P. N. Owens 83–91

Pesticides and heavy metals in Danish streambed sediment
B. Kronvang, A. Laubel, S. E. Larsen, N. Friberg 93–101

Macroinvertebrate/sediment relationships along a pesticide gradient in Danish streams
Nikolai Friberg, Majbrit Lindstrøm, Brian Kronvang, Søren E. Larsen 103–110

Suspended sediment fluxes in chalk streams in the Hampshire Avon catchment, U.K.
M. J. T. Heywood, D. E. Walling 111–117

Changing suspended sediment and particulate phosphorus loads and pathways in underdrained lowland agricultural catchments; Herefordshire and Worcestershire, U.K.
I. D. L. Foster, A. S. Chapman, R. M. Hodgkinson, A. R. Jones, J. A. Lees, S. E. Turner, M. Scott 119–126

GIS-based distributed model for simulating runoff and sediment load in the Malian River Basin
Y. F. Huang, X. Chen, G. H. Huang, Bing Chen, G. M. Zeng, J. B. Li, J. Xia 127–134

Characterising the fine sediment budget of a reach of the River Swale, Yorkshire, U.K. during the 1994 to 1995 winter season
B. P. G. Smith, P. S. Naden, G. J. L. Leeks, P. D. Wass 135–143

The provenance of sediments in Moreton Bay, Australia: a synthesis of major, trace element and Sr-Nd-Pb isotopic geochemistry, modelling and landscape analysis
G. Douglas, M. Palmer, G. Caitcheon 145–152

Evaluating the impact of watershed management scenarios on changes in sediment delivery to rivers?
G. Verstraeten, A. Van Rompaey, J. Poesen, K. Van Oost, G. Govers 153–158

The influence of catchment characteristics on suspended sediment properties
C. Ankers, D. E. Walling, R. P. Smith 159–167

Modelling sediment supply to rivers and reservoirs in Eastern Europe during and after the collectivisation period
A. Van Rompaey, J. Krasa, T. Dostal, G. Govers 169–176

Morphological controls on medium-term sedimentation rates on British lowland river floodplains
R. J. Sweet, A. P. Nicholas, D. E. Walling, X. Fang 177–183

Temporal changes in the metal and phosphorus content of suspended sediment transported by Yorkshire rivers, U.K. over the last 100 years, as recorded by overbank floodplain deposits
Philip N. Owens, Desmond E. Walling 185–191

Anoxic degradation of biogenic debris in sediments of eutrophic subalpine Lake Bled (Slovenia)
Branko Cermelj, Jadran Faganeli 193–199

Chemical equilibrium modeling of copper precipitation in a hyper-concentrated solid-liquid system
Xu Nan, Sun Weiling, Ni Jinren 201–206

Biogeochemical influence on carbon isotope signature in boreal lake sediments
N. Ogrinc, H. Hintelmann, C. Eckley, S. Lojen 207–213

Carbon and nitrogen content of suspended matter in a Hong Kong drainage basin
M. R. Peart 215–222

Spatial and temporal variability of particulate phosphorus fractions in seston and sediments of Lake Kinneret under changing loading scenario
Werner Eckert, Julia Didenko, Efrat Uri, Dganit Eldar 223–229

PART C: EVALUATING CHANGE IN SALINE AND/OR FRESHWATER HABITAT

Hydrodynamical impact on biogeochemical processes in aquatic sediments
Markus Huettel, Hans Røy, Elimar Precht, Sandra Ehrenhauss 231–236

Application of Phoslock™, an innovative phosphorus binding clay, to two Western Australian waterways: preliminary findings
Malcolm Robb, Bruce Greenop, Zoe Goss, Grant Douglas, John Adeney 237–243

Bioturbation experiments in the Venice Lagoon
C. Mugnai, M. Gerino, M. Frignani, S. Sauvage, L. G. Bellucci 245–250

Response of fishes and aquatic habitats to sand-bed stream restoration using large woody debris
F. Douglas Shields, Jr., Scott S. Knight, Nathalie Morin, Joanne Blank 251–257

Applicability of the Langmuir equation to copper sorption by loess with high carbonate content
Ni Jinren, Sun Weiling 259–263

Comparative study of bedload sediment yield processes in small mountainous catchments covered by secondary and disturbed forests, western Japan
Naoyuki Nishimune, Shin-ichi Onodera, Tomohiro Naruoka, Moch D. Birmano 265–270

Quantification of erosion rates for undisturbed contaminated cohesive sediment cores by image analysis
Oliver Witt, Bernhard Westrich 271–276

Metals, trace elements, and organochlorine compounds in bottom sediment of Tuttle Creek Lake, Kansas, U.S.A.
Kyle E. Juracek, David P. Mau 277–282

Polycyclic aromatic hydrocarbons in sediments of the Venice Lagoon
M. Frignani, L. G. Bellucci, M. Favotto, S. Albertazzi 283–290

Relative roles of stream flow and sedimentary conditions in controlling hyporheic exchange
Aaron I. Packman, Mashfiqus Salehin 291–297

Long and short term variations in suspended particulate material: the influence on light available to the phytoplankton community
Donald C. Pierson, Hampus Markensten, Niklas Strömbeck 299–304

A dynamic model for flow and wind driven sediment resuspension in a shallow basin
Hampus Markensten, Donald C. Pierson 305–311

The need and means to characterize sediment structure and behaviour prior to the selection and implementation of remediation plans
Gary G. Leppard, Ian G. Droppo 313–317

Temporal variability of particulate organic carbon, nitrogen and phosphorus in the Northern Adriatic Sea
Michele Giani, Fabio Savelli, Alfredo Boldrin 319–325
